

I urge you to keep New Jersey's Do Not Call List as it is. For the citizens of New Jersey, it has been very successful. I feel that receiving unsolicited phone calls is an invasion of my privacy and am very offended by it. This refers to both companies that I have never done business with as well as companies that I have done business with in the last 18 months. I don't want to hear from them and should have the right to say so.
